Monthly Rental : The minimum rental payment period is six (6) months. An instrument may be returned at any time. However, the minimum rental period is six (6) months.

Optional Monthly Insurance : Insurance is optional. Some hirers' household insurance may cover the rental instrument. So, hirers are encouraged to check their household insurance policies. Nevertheless some hirers prefer to have the peace of mind of this specific insurance coverage to cover theft and damage. (Refer to web site for details)

Once Only Setup Fee : The once only setup fee establishes the rental agreement and includes delivery if required.

Rent to Buy Option: All rental payments made during the first six (6) months can be deducted from the cost of the instrument if purchased during that time (Not including insurance or the setup/delivery fee). All rental payments made during the first six (6) months and half of all payments made during the following eighteen (18) months can be deducted from the purchase price if purchased later on (Not including insurance or the setup/delivery fee).

Trevor James 10x Flutes

Trevor James is an English manufacturer that has been making premium quality student through to professional flutes for over 25 years. The 10x model is widely recognised as one of the best student flutes available in terms of construction, design, performance and value for money.

It is crafted with much attention to detail, including, a highly responsive superior head joint, silver plating, accurately seated, fine double-skin pads, careful regulation, smooth mechanical action and finely fitted joints

Teachers find these flutes desirable as due to the head joint design, students are able to comfortably obtain the difficult lower notes with much more ease than on other student flutes.

All 10X series flutes can comfortably see a student from primary levels through to VCE.

For more information on Trevor James flutes go to www.worldwind.co.uk

Trevor James 10x Curved Head Flutes

Rather than the traditional straight flute, these have the head joint in the shape of a “U bend”. This is designed for young or smaller students who would otherwise find it a very big stretch or even impossible to comfortably hold and play a flute with a straight head joint.

If this is the case, it may be desirable to have a flute with both the curved and straight head joints. The player can try the traditional straight head joint from time to time to see if they have grown enough to play a straight flute. It also avoids the bother of ordering and specially fitting a straight head joint later on.

Jupiter Band Instruments

Jupiter is the fastest growing manufacturer of quality band instruments in the world today. They have a reputation for the best value student instruments available All have durable finishes, have been manufactured with incredible attention to detail and have proven longevity and reliability.

For more information on Jupiter Instruments go to www.jupiterinstrument.com

Jupiter 631 Clarinet

A finely made, durable student instrument featuring a maintenance free "duraline" plastic body (standard for student clarinets) with a satin brushed finish. Accurately padded, it also has extremely tough forged nickel plated keys that reliably keep their adjustments in the hands of younger players. Its case can be worn as a back pack for ease of carrying.

An ideal junior clarinet for primary though to secondary levels.

Jupiter 565GL Alto Saxophone

This is undoubtedly the best value student saxophone on the market. It features incredibly fine pad work, high F# key, precision machined and tightly fitted key work, gold epoxy lacquer on body and keys, adjustable thumb rest, power forged keys and a detachable bell for ease of maintenance.

It has accurately levelled tone holes and an easy to play, responsive low register. Nothing comes close to this saxophone in terms of value, quality and ease of playing. Presented in a solid, wood frame case.

Jupiter 769GL Alto Saxophone

This is the step-up model from the 500 series. This saxophone will take a student from beginner to advanced and beyond. Pro musicians have given it the thumbs up with its fully adjustable action and metal resonators for bigger sound. It is presented in a deluxe case which can double as a back pack for ease of carrying.

Jupiter 410L Trumpet

The 410L is a budget priced instrument made with extraordinary attention to detail and quality. It is undoubtedly the best value student trumpet on the market. It has a rose brass lead pipe and tuning slide crook, brass slides and nickel silver receivers. Along with the standard 3rd slide finger ring, it also features a 1st slide tuning hook which is usually found only on “step up” models. This means a much longer life before an advancing player grows out of this model. Has a lightweight, rugged plastic case.

Jupiter 232L Trombone

The standard student trombone. Features yellow brass bell and accurately fitted hand slide. They are supplied with fitted hand slide protector sleeves, which are made from “bottle plastic”, are very tough and help avoid the nicks and bows that young players can otherwise easily cause. Suitable for primary through to secondary levels.

Jupiter 432L Trombone

This features a nickel silver hand slide that is more durable, offers a smoother action, increases instrument longevity and is more resistant to dents and bends. The most popular student trombone on the market today. It has an ergonomically designed case which doubles as a back pack for ease of carrying. Suitable for primary students up to VCE and beyond.

Jupiter 438L “Head start” Trombone

This model has all the features of the 432L Trombone but with special features to help very young or small players to cope better with holding & playing the trombone. It has a special pistol grip on the slide, an adjustable thumb rest along with a special ergonomic design to lessen the stretch required for some notes. It has an ergonomically designed case which doubles as a back pack for ease of carrying.

Yamaha Band Instruments

Yamaha is one of the best known brands in many areas of manufacturing. They have a well deserved reputation for quality, reliability and longevity.

For more information on Yamaha go to www.yamaha.co.jp/english/products/winds/

Yamaha YCL 250 Clarinet

This model is made from maintenance free ABS resin and is exceptionally durable and maintenance free. It features synthetic “V” pads which are extremely resistant to damage from moisture or oil, provide long-lasting adjustments and are easier to care for than traditional pads.

Yamaha 275 Alto Saxophone

The 275 saxophone is an industry standard for entry level saxophones. They are suitable also for advancing players through to VCE and beyond. The high F# key is standard, they offer durability, good tone and tuning along with proven reliability. The case is made of a lightweight and durable ABS resin.

Yamaha 1335 Trumpet

Yamaha student trumpets are easy to play and offer durability, good tone and tuning along with proven reliability. This standard model offers a choice of either gold lacquer or a silver plated finish. Presented in a solid moulded plastic case.
